COMPTIA A+

CCNA CISCO CERTIFIED NETWORK ASSOCIATE

MICROSOFT AZ-900 (AZURE FUNDAMENTALS)  
AZ-400 (AZURE ADMINISTRATOR, IN-PROGRESS)

## SUMMARY

Passionate cloud enthusiast with a remarkable home lab on Microsoft Azure. Committed IT support specialist with over two years of experience providing exceptional client experiences while continuously learning about cloud technologies. Driven by an insatiable desire to experiment, problem-solve, and construct enterprise-grade Azure infrastructures.

## PROFESSIONAL EXPERIENCE

### CONTENT CREATOR

Zeicor

2017 - 2020

- Wrote technological articles and news.
- Text had to meet the requirements in order to be approved.
- Delivered quality unique work.

## CLOUD EXPERIENCE

### MICROSOFT AZURE LAB HACKING JULY 2022

- Constructed a simulated enterprise network and vulnerable machines by setting up a hacking lab in Microsoft Azure.
- Created a domain controller on Windows Server 2022 and linked it with two Windows Server 2019 machines on Azure Virtual Machines. Added two Windows 11 VMs to the domain.
- Established several VNETS within the Resource Group to imitate various network subnets.
- Monitored system performance and established notifications using Azure Monitor.

### LAB FOR NETWORKING HOSTED ON THE AZURE PLATFORM.

Cisco/Palo Alto

January 2022

- Set up GNS3, a network emulation tool, on the Microsoft Azure cloud platform.
- Created enterprise-level Cisco networking configurations in preparation for the CCNA exam.
- Incorporated Palo Alto firewalls in different topologies and established distinct firewall rules and policies.
- Automated network updates and rollouts through Python scripts and netmiko.
